Summer program

FIELD ACTIVITIES IN TWO SITES

LABORATORIES

LECTURES

New transversal approach, designed for upper level undergraduate and graduate students. This year our school includes sistematic excavations in three important sites: Colle S. Stefano (Early-Neolithic period), Rio Tana (Neolithic period) and Alba Fucens (Roman period). Lectures and laboratory activities are going to complete our program. Students will gain an advanced understanding of archaeological research techniques and strategies, concurrently with basic notions of Mediterranean archaeology and archaeometry.
