

# CALL FOR APPLICANTS FOR THE 2018 FIELD SCHOOL {JULY 29 - AUGUST 18}

*EXCAVATE IN THE ALENTEJO REGION OF PORTUGAL!*

## *THE PROJECT*

Castelo sits atop the easternmost hill in a chain of three consecutive Bronze Age hilltop settlements on the Serra d'Ossa. The site has exciting prospects due to its large size, its lack of a nearby water source, and its surrounding wall; possibly defensive in nature. We hope to gather material, architectural, and geographic data in order to grasp a better understanding of social structure during this understudied period.

## *THE FIELD SCHOOL*

Prior experience in archaeology is not required - students of all backgrounds are encouraged to apply. This field school will train students in archaeological methods, such as excavation techniques, recording, illustration, and the handling and processing of artifacts.

Tuition for the **3 week session** (including room, board, and transportation within Portugal) is **\$1500 USD**. The application deadline is May 1, 2018. Students are encouraged to apply early as admission is on a rolling basis.
