

SANTA SUSANA ARCHAEOLOGICAL PROJECT

Western Iberia Archaeology seeks applicants for its seventh season of fieldwork at the Roman Villa of Santa Susana in the Central Alentejo region of Portugal.

ABOUT THE PROJECT

This site of Santa Susana holds a villa complex important to our understanding of the processes of colonization and settlement in this part of the Roman Empire. Preliminary work at the site suggests a rich artifact assemblage dating from the 1st cent. C.E. through the 6th cent. C.E. In our seventh season, an intensive survey combined with open area excavation in the *pars urbana* will aid in understanding the extent and nature of occupation at the site.

ABOUT THE FIELD SCHOOL

Field school students will receive instruction in surveying techniques, the handling and processing of artifacts, archaeological excavation, and the recording of exposed areas and features. No prior archaeological experience is necessary.

Participants may attend for 2, 3, or 5 week sessions. Tuition is \$1200 for 2 weeks, \$1800 for 3 weeks, or \$2800 for 5 weeks and includes room, board, and transportation within Portugal.
