This site of Santa Susana holds a villa complex important to our understanding of the processes of colonization and settlement in this part of the Roman Empire. Preliminary work at the site suggests a rich artifact assemblage dating from the 1st cent. C.E. through the 6th cent. C.E. In our seventh season, aerial photography, field survey, and open area excavation in the pars urbana will aid in understanding the extent and nature of occupation at the site.

Field school students will receive instruction in surveying techniques, the handling and processing of artifacts, archaeological excavation, and the recording of exposed areas and features. No prior archaeological experience is necessary. Beginners are welcome!

Participants may attend for 2, 3, or 5 week sessions. Tuition is $1200 for 2 weeks, $1800 for 3 weeks, or $2800 for 5 weeks and includes room, board, and transportation within Portugal. Discounted tuition is available for qualified university students.
