Archaeology-focused tours for the curious to the connoisseur.

Archaeological Institute of America Lecturer & Host

María Nieves Zedeño (PhD 1991, Southern Methodist University) is a Research Anthropologist at the Bureau of Applied Research in Anthropology and a Professor of Anthropology at the School of Anthropology, University of Arizona, in Tucson. Her areas of expertise include northern Plains archaeology, ethnohistory, and ethnography, and her research focus

is on hunter-gatherers, landscape and place theory, and social history in archaeology. Zedeño is an applied archaeologist who has worked collaboratively with many Native American tribes across North America, and especially with the Canadian and American Blackfoot. Her recent research projects, sponsored by the National Science Foundation, entail landscape archaeology of precontact bison hunting, Blackfoot early origins along the Ice-free Corridor, and the development of an interactive virtual atlas that combines oral traditions with archaeology and earth sciences for the education of tribal children.

Join us on an American adventure, from the plains of North Dakota to the pueblos of New Mexico, as we explore Native American archaeological and historical sites as well as spectacular National Parks. Experience this part of the country in a different way, gaining new perspectives and learning about the histories of indigenous peoples, in the company of AIA lecturer and host María Nieves Zedeño, a North American archaeologist, plus local guides and your tour manager.

What to Expect

This program involves extensive walking, often on uneven terrain or up and down stairs that may be steep and without handrails. This program covers many miles across states and there will be some days with long bus rides. All participants are expected to be physically active and not be an impediment to others on excursions, and to enjoy traveling as part of a group. Participants who are not able to walk or stand unassisted for extended periods are kindly advised not to join this tour. Participants with lung or breathing concerns should be aware that portions of our program will be in high altitude areas (Denver is 5,280 feet above sea level). If the tour manager decides that a participant cannot visit a site safely or in a timely manner, their judgment will be final. Where possible, an alternate activity may be suggested; additional costs may apply. If you have any questions about your ability to participate, we suggest that you visit your personal physician with this brochure in hand, and discuss whether or not the program is appropriate for you. Weather in these regions in September is generally pleasant, with average daytime temperatures ranging from the low 70s to high 80s. Overnight temperatures may dip into the high 30s. *Complete pre-departure details and what to pack will be sent to participants.*
